

An invitation to: What Wants to Happen?

Living into A Whole New Game – A New Tier of Consciousness

Franciscan Renewal Center, Scottsdale, Arizona, April 2 – 6, 2014

We invite you to the **SECOND** in a new series of personal development retreats, which is the annual gathering in support of second tier living and working from the New Edges Learning Community. **Living into a Whole New Game** is a practice place for incorporating the age of cooperation into our personal and professional lives. You are invited to attend a four-day retreat where you will learn about, explore, and extend the principles of this new era. Co-creation and interdependence are the foundation of the workshop experience.

In this retreat you will:

- Have first-hand experience of uncovering and incorporating ideas that resonate in the age of cooperation.
- Experiment with using the Whole New Game concept (as well as the elements of purpose, play and presence) in your coaching practice and daily life.
- Co-create an experiential process for the New Edges Learning Community to expand our collective worldview.
- Have the opportunity to lead a section of the retreat process contributing your own perspectives and inquiries to the practice, if you choose.

The first day of our retreat will include specific modules and conversations about:

- The values and principles we are striving to embody in our membership in this community.
- A deeper exposition and exploration of our evolution into a higher level of realization which we are calling 2nd Tier Consciousness. We call on the principles of adult change and developmental stages, integral spirituality, and the power of play, presence and purpose.

This time will position us well to embark on the remainder of the co-created and co-facilitated retreat retreat from a grounding in both the theory and practice of a new tier of consciousness.

We are taking reservations for the mid-winter event to be held at the Franciscan Retreat Centre in Scottsdale, Arizona. This retreat is intended for seasoned adults and professionals who are engaged in exploring the present in order to create the future that is about to happen.
